

ADP DISTRIBUTION BY FACILITY TYPE

The "Average Daily Population" (ADP) of the DOC was 30,373.* ADP is the sum total of the offender population resulting from periodic head-counts divided by the number of observations. There are four basic types of DOC facilities - major institutions, field units, work centers, and community facilities - but there are differences between individual facilities within each type. The offender's security risk (6 security risk levels, Level 1 being the lowest and Level 6 being the highest), health care needs, educational needs, age, area of residence, etc. determine where an offender is housed. Offenders can be placed in a community facility (Detention/Diversion Center) by a court of law or direct referral by the Division of Community Corrections.

FACILITY TYPE	FY 2005	FY 2004
Major Institutions	25,495	25,554
Field Units**	2,662	2,744
Community Corrections Facilities	878	810
Work Centers	1,338	1,099
	30,373	30,207

* The above ADP statistics refer to offenders housed in facilities operated by DOC. Excluded from these statistics are 1,568 DOC inmates housed in a privately-operated prison in Lawrenceville.

** Pulaski, Botetourt, and Baskerville costs will continue to be reflected in the field unit per capita rate and direct and indirect cost statements.
